TO WHOM IT MAY CONCERN

DIANA CAROLIN

Diana has been known to me for many years. She learnt to ride with me as a child and competed very successfully in pony club and as a junior member of the western Province showing team. She has developed into a dynamic and sensitive rider over the years. Although horses and riding have not been her main source of income as an adult she has never the less maintained her interest in the sport.

During the period in which my late husband and I owned and ran a successful warmblood stud on our farm (1995 – 2010) she helped us on many occasions and for extended periods with management, showing (at which she is exceptionally good) and production of young stock.

My interest is and always will be in young riders and young people with special needs. Along side the stud we also ran a small but busy riding school. Here Diana proved to be a very good motivator for particularly those children who were not sure of them selves. She has a very generous outlook on life in general and is good at working with unconfident and unsure riders. She is insightful and sensitive to their needs.

Diana is also a very good competitive cyclist. She is extremely fit and dedicated to what ever she puts her mind to. She is reliable, responsible and experienced in management. She was also very good at communicating with our other farm staff.

As we live a good distance from the main competitive hub of Cape Town (500kms) she was also required to travel long distances with our horses to shows and sales. She is very competent behind the wheel and at loading and unloading particularly tricky horses.

Diana is very hard working, can take responsibility and is a cheerful and happy person to have around.
