

Be part of something massive.

Mentoring is a critical part of Pathways into Primary Industries (PIPI) - a people-centered programme to pair people ready to begin a great career in our industries with employers and support them on their journey with a mentor.

Mentoring provides an opportunity for you to build a productive relationship with someone entering the industry. As a mentor you will help ease the transition into the primary industries, and is your opportunity to share your knowledge and experience.

We are looking for people who :

- are people from the community who want to make a difference through volunteering
- are of any age
- can come from any part of the industry, and from any industry.
- will commit to at least 6 months of mentoring.

To find out more about volunteering as a mentor, please email pipi@primaryito.ac.nz
